Description

After upgrade from version 9.1 to version 12.0 the score feature does not work anymore. After login the score is is set to 1.

This bug started in r45775 where `$table->increment($score)` was removed.

Displaying a star behind the username was removed in r47705. Which makes the score feature more or less useless.

Hi schmidt

Good catch, I guess.

Can you fix this issue yourself, if you could test your proposed fixes? (maybe other things were removed in the code to make the feature back working?)

See <http://dev.tiki.org/Commit> and related links, to get commit access, and where to commit, etc.
