### Description

There is one pending issue in PluginTrackerCalendar in 12x & 13x , and it was working fine in 10x, as far as I remember

Show instance where some of this issues are reproduced:

<http://xavi-9794-5177.show.tikiwiki.org>

u: admin

p: 12345

Pending still:

If you use some uppercase letter in the string of the tracker field "location" (used as a the resource field for the resource-related views), then the item is not shown through the resource views, only through the calendar type of views.

Replacing uppercase letters with lowercase in the values of those fields solves the issue as a workaround until a proper fix is found/committed

Reproduced here:

[http://xavi-9794-5177.show.tikiwiki.org/tiki-index.php?page=Tracker\\_as\\_Calendar\\_10](http://xavi-9794-5177.show.tikiwiki.org/tiki-index.php?page=Tracker_as_Calendar_10)

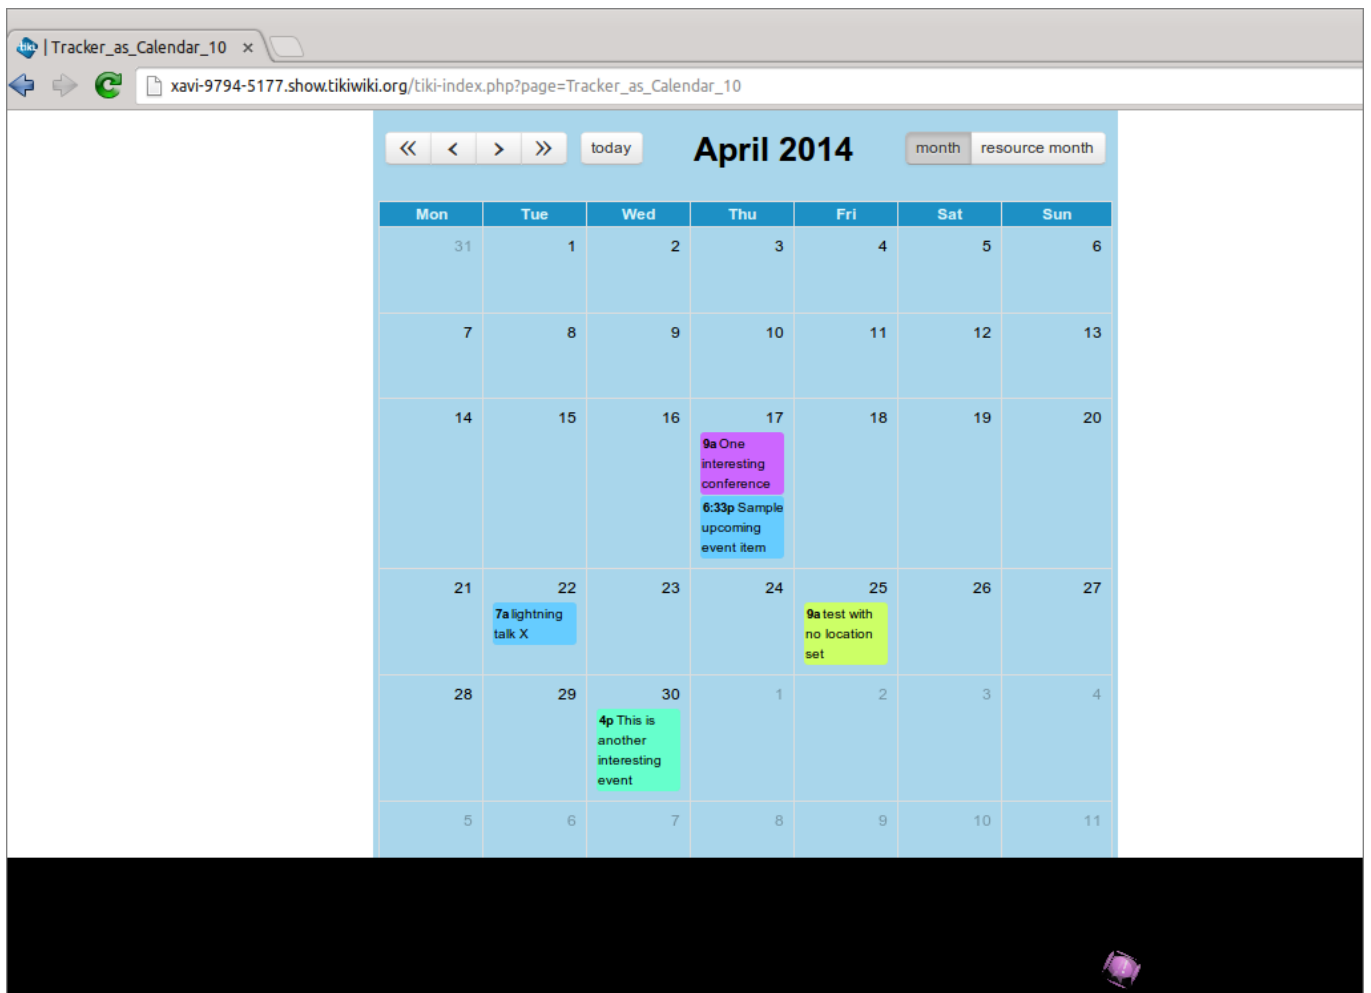

In the resource month, 3 items are shown.

In the calendar view, 5 items are shown. The extra 2 are the ones with upper case in the contents of the "location" tracker field (the field used as resource).

With "resource month" view:

The screenshot shows a web browser window with the URL `xavi-9794-5177.show.tikiwiki.org/tiki-index.php?page=Tracker_as_Calendar_10`. The page title is "Tracker\_as\_Calendar\_10". On the left is a sidebar menu with links: Search, Calendar, Wiki, File Galleries, Trackers, and Admin. The main content area has a header "Tracker\_as\_Calendar\_10" and a sub-header "Display tracker items in a calendar or resource view". Below this is a navigation bar with "Manage items through Fullcalendar (Tiki 10) & Filter items (Tiki 9)", an "Add items" button, and a "No Tabs" button. The calendar view is for April 2014, with tabs for "month" and "resource month". The "resource month" view shows a grid of dates from 4/1 to 4/30. The grid has five rows representing different locations: "Chapel conference room", "main conference room", "main conference room (200 seats)", and "room 1.1 (55 seats; not the main)". The "Chapel conference room" row has a purple event on 4/17 labeled "9: in cc" and a blue event on 4/22 labeled "7: ta X". The "main conference room" row has a yellow event on 4/25 labeled "9: w ni lo st". The "main conference room (200 seats)" row is empty. The "room 1.1 (55 seats; not the main)" row is empty. The bottom of the page is a black bar with a small purple icon.

With "month" view:

Things Fixed already

Solution

r51612 seems to solve this, although it seems like it was intentional to convert items to lowercase

it's not solved yet. If the optional values in the field used as resource contain upper case, then the items are not shown in the tracker calendar.

Reproduced in Tiki12.4

Hopefully fixed in 14.x in r55292 and 12.x in r55293 (backport to 13.x still todo all in one)

Tested in current 12.x and it shows up as solved. Thanks jonnyb and marclaporte!
