Description

If a valid wikilink is included within a comment on a wiki page, that link is reported by BACKLINKS on the page being linked to.

Test_MRB_01

□□□□□□□□

This page uses the BACKLINKS plugin to show pages with links to it -
{BACKLINKS()}{BACKLINKS}

Test_MRB_02

□□□□□□□□

This page has three source lines, the second of which is a comment. ~tc~((Test_MRB_01|This link to Test MRB 01 is in a comment))~/tc~ This is the third line, but only two lines visible when viewed.

This is the first time I've tried to use the SHOW feature. Using the default "truck" option, I'm asked to provide database credentials, which doesn't seem to be covered in the guidance notes.

Hopefully the code snippets are sufficient.

Destroyed the initial SHOW instance using the button provided and then tried to create a SHOW instance using version "12.x" and <http://emmarrbee.minus11078.minus5229.show.tikiwiki.org/reports> Tiki Installer missing third party software files.
