Description
  When you reply to a comment, the threaded one (i.e. the one at the second level) is not showing.

Solution
  r51651 fixed it

Workaround
  note: mani is working on a fix

  gezza's note: i also looked at it, maybe you find my findings useful. This seems to me a Tiki issue, not a smarty one.
  In templates/comments/list.tpl on line 93 there is a smarty include.

  ```
  {include file='extends:layouts/internal/layout_view.tpl|comment/list.tpl'
  comments=$comment.replies_info.replies cant=$comment.replies_info.numReplies
  parentId=$comment.threadId}
  ```

  I you change templates\layouts\internal\layout_view.tpl to this:

  ```
  {if zone_is_empty('left')} {block name=content}{/block} {else} {block name=content}{/block}
  {/if}
  ```

than the nested comments are displayed. You can change the zone name in zone_is_empty to any other (eg: rigth, bottom, etc), it still works.
Could not get further with this.

mani's note:

This issue is because of the layout view used for the comments.
for the second level and more than that the layout_view.tpl is called.

In layout_view.tpl the content is empty so the comments are not showing.

As per previous we can call the same ie(comments/list.tpl) file to show the next level comments.

But in that method also the header footer added for each comment because in top of comment/list.tpl the layout_view.tpl is extended.
