Related-to

- 14.x: Comments can't be posted nor edited when codemirror is switched on (or 'disabled but switchable')

Description

12.x: can't post comments if codemirror is on (it says 'Content is empty'). This was working in 9.x.

Tried with jgui, codemirror on (default theme). Reproduced in a show.t.o instance for 12.x:
<http://xavi-9794-5256.show.tikiwiki.org/tiki-index.php>

Log in as:

u: admin

p: 12345

and try to ad a new comment.

When you click first to toggle highlighter (disable codemirror for that page and visit), then you can post the comment with no problem.

If this is too difficult to fix in codemirror implementation in Tiki, maybe some preferences would help to indicate in which section to have codemirror on (main text areas from wiki pages, trackers, etc), but disabled for comments, etc.
