### Related-to

- ✖ jCapture sometimes has issues when using more than one screen

### Description

To test, just click the little camera on the toolbar. You need Java installed.

### Workaround

I think it works if you turn "Use legacy tracker insertion screen" in Admin.. Trackers on. (but of course we are trying to test the new popup interface so setting it like that will interfere with testing.. Perhaps you can try that for now and confirm if it does in fact work? Thanks.

Anyone can see if it's a quick fix? If not working around is an option.... I think it works if you turn "Use legacy tracker insertion screen" in Admin.. Trackers on. (but of course we are trying to test the new popup interface so setting it like that will interfere with testing.. Perhaps you can try that for now and confirm if it does in fact work? Thanks.

Marc Laporte 07 Jul 14 19:38 GMT-0000

So I tried that, and the issue remains.

The Java confirmation message appears, but after that, then selection area never appears.

Shall I turn the pref back to the way it was?

Thanks!

Marc Laporte 10 Jul 14 13:51 GMT-0000

"Use legacy tracker insertion screen" is now at off.

Thanks!
