Related-to

- ✖ codemirror not switchable for new comments (but just for comment edition) even if preference correctly set
- ✖ 12.x: can't post comments if codemirror is on (it says 'Content is empty')
- ● Allow end user to switch codemirror on in tracker field textareas when the site feature allows

Description

Fixed in 12.x

[+]

still present in 13.x and trunk

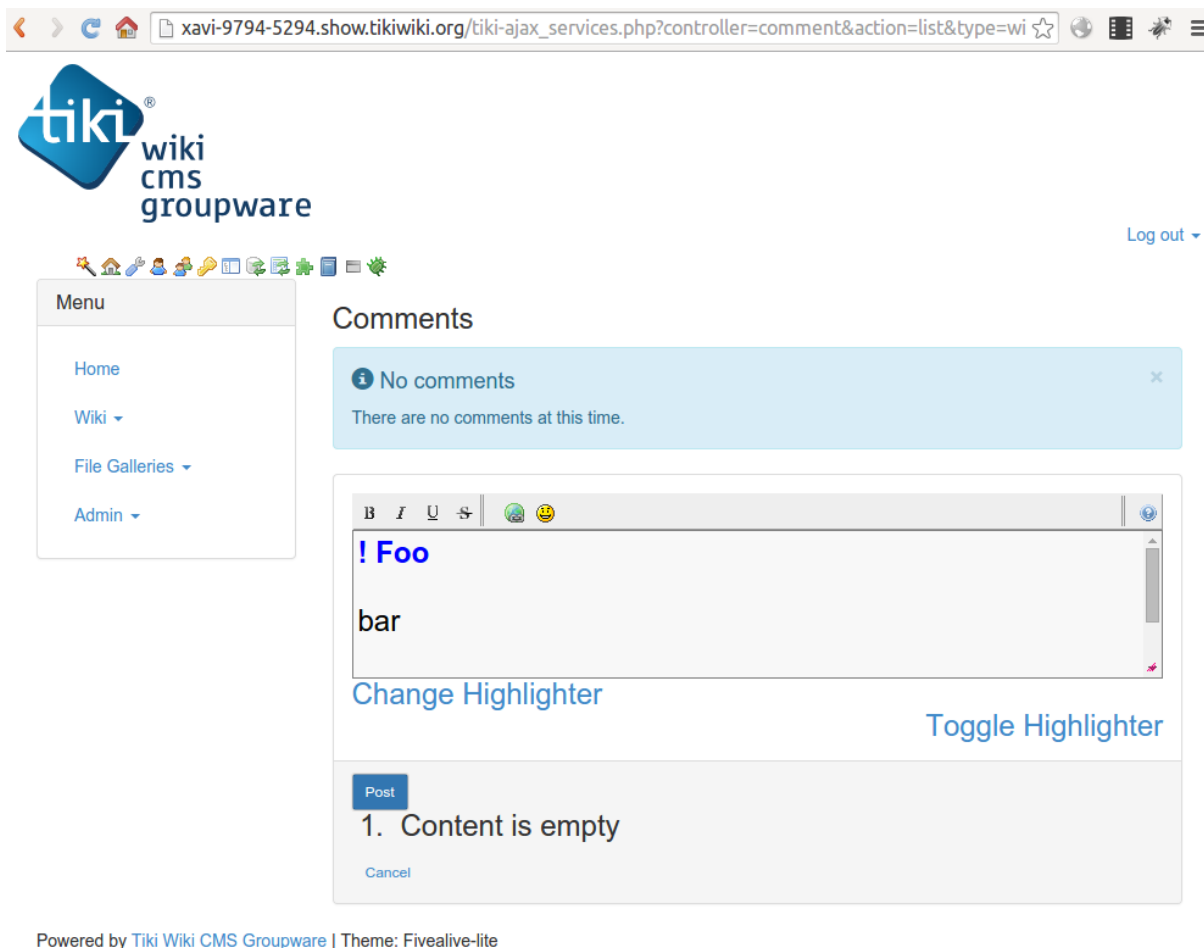

To reproduce in 13.x, try to edit this comment with the highlighter toggled to on the homepage of:

<http://xavi-9794-5294.show.tikiwiki.org>

http://xavi-9794-5294.show.tikiwiki.org/tiki-ajax_services.php?controller=comment&action=list&type=wiki+page&objectId=HomePage#comment-container

p: 12345

Regression: In 9.x comments could be posted or edited even if codemirror was on.

Update: issue still present in 13.x in r53262 and in trunk r53255 after it has been fixed by patrick-proulx and same fix applied to 13.x and trunk. Something else must be missing somewhere....

Update 2: issue still present in 13.x with code updated as of January 10, 2015.

Update 3: Fixed in 14.x but not in 13.x. Oh well, I close this bug report, since 14.0 will be out very soon, etc.

Solution

fixed in r53252 (thanks Patrick Proulx)

not fixed in 13.x and trunk yet, as of r53262 in 13.x, and r53255 in trunk.

Update 2: issue still present in 13.x with code updated as of January 10, 2015.

--

Seems fine now in 14.x for me, can you recheck please? Thanks

Yes, fixed in 14.x (not in 13.x). Anyway, so far so good! (and 14.0 will be out soon) Thanks for fixing

whoever participated in the fix!

Also notice that in 13 code mirror cannot be enabled while posting, only when editing. Not sure if this was due to workaround the bug that Xavi reported
