- ✖ 12.x: Ratings in articles don't show all options, just a single radio button

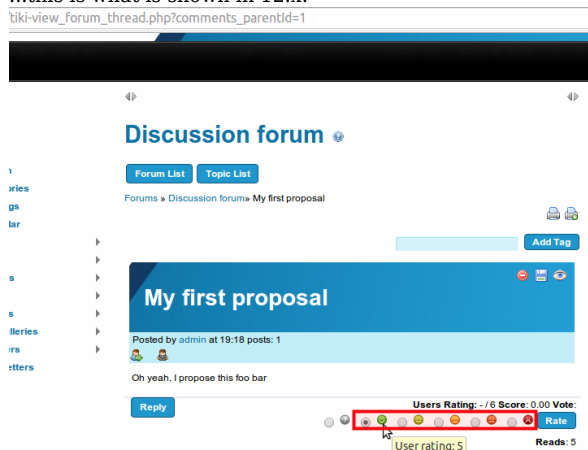

Description

13.x regression: rating_smiley icons in reversed order

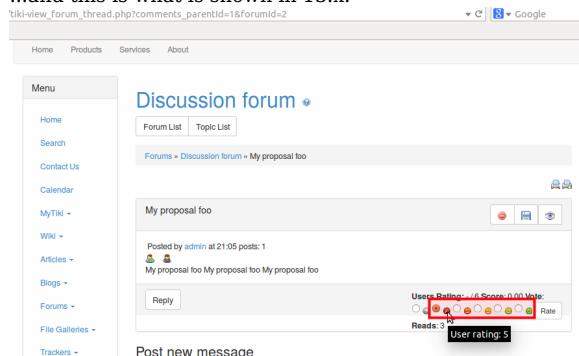

Equivalent configuration in 12.x and 13.x (values for rating are "0,5,4,3,2,1")

When going to rate a forum post (url such as tiki-view_forum_thread.php?comments_parentId=1&forumId=2)...:

...this is what is shown in 12.x:

...and this is what is shown in 13.x:

To see it reproduced, go there:

http://xavi-9794-5328.show.tikiwiki.org/tiki-view_forum_thread.php?comments_parentId=1&forumId=2

User1 rated that thread with a 5, even if the smiley icon is shown as red.

log in as:

u: user1

p: user1

You can also log in as admin with

u: admin

p: 12345

And there is another plain registered user:

u: user2

p: user2

The same happens in wiki_simple_ratings (icons shown in revered order). See it reproduced here:

<http://xavi-9794-5328.show.tikiwiki.org/tiki-index.php?page=HomePage>
