Description
Customized Homepage with profile "Personal Blog and Profile" cannot be reverted back to wiki homepage

To reproduce, apply this profile and attempt to revert back the custom homepage to use wiki homepage.

It didn't work either by means of setting a new homepage for registered users.

Reproduced here:
http://xavi-9794-5348.show.tikiwiki.org/tiki-view_blog.php?blogId=1

Custom homepage disabled, but anonymous visitors still get the blog homepage:
http://xavi-9794-5348.show.tikiwiki.org/tiki-view_blog.php?blogId=1

To logi:
u: admin
p: 12345

Reproduced in Tiki13 also.

Solution

Remove tikiIndex declaration from the profile definition.

Then, tiki works as expected. If you remove the useUrlIndex pref, tiki behaves as expected.
