CodeMirror doesn't minify like everything else does | Tiki Wiki CMS Groupware :: Development

CodeMirror doesn't minify like everything else does

Status

✖ Closed

Subject

CodeMirror doesn't minify like everything else does

Version

12.x

13.x

Category

- Conflict of two features (each works well independently)

Feature

Performance / Speed / Load / Compression / Cache

Syntax highlighter (Codemirror)

Resolution status

Fixed

Description

Do a view source of the show instance and you will see:

```
<script type="text/javascript"
src="vendor/codemirror/codemirror/lib/codemirror.js"></script>
```

Perhaps it's kept separate to be lazy-loaded when needed, but supplying a minified version of the file would be better.

Solution

working in recent versions
