Description

**To reproduce:**

- Create a tracker
- Add radio field radio1 with values a,b,c,d,e,f
- Add radio field radio2 with values 1,2,3,4,5,6
- Create wiki page, use the tracker plugin: (with the right field and tracker id)

**Missing or incorrect trackerId parameter for the plugin, List Trackers**

- Click on the label for the value "2" in the radio2 field.

It should not select option "b" of radio1, but it does, since the share the same id.
It is fine in Tiki 12 and up.
