Description

Since 14.x displayList=y broken in Plugin TrackerFilter, and therefore, featured Collab Community profile broken

Tested with trunk r52418

To reproduce:

1. apply Collaborative_Community_12x profile.
2. Go to the registered users homepage. You'll see an almost WSOD with just the table header (of the trackerplugin) at the top.
3. Edit the TrackerFilter plugin params to set displayList=n and everything will display correctly (but no list of items pre-displayed)

Error message in the show.t.o instance where has been reproduced:

Welcome, Jonny! (that's why/how I tracked the issue, because I did read it in the irc log, and I'd like to keep the featured profiles working at least until Tiki 15.x LTS ;-))
