Description
14.x: Tracker inline editing broken through Plugin TrackerList

Reproduced after for instance applygin profile Bug_Tracker and set the param in the plugin
trackerlist "editableall=y". See it here:
http://xavi-9794-5455.show.tikiwiki.org/tiki-index.php?page=Bug_Tracker
u: admin
p: 12345

Fields are open for edition, without clicking on them.
Correct behavior shown when listing items through the tracker interface directly:
http://xavi-9794-5455.show.tikiwiki.org/tiki-view_tracker.php?trackerId=1

You can do the same thorugh PlugintrackerList on 12.x or 13.x, and it behaves properly (fields only
open for edition when you clik on them)

-

UPDATE:

- after this instance has been svnupdated to r52471, behavior is fixed (thanks marc & lph), but icons (indicating which fields are editable inline) are currently lost (no icons shown neither through trackerlist nor through the tracker iteself).
- apache error message in the logs:

No route found - full:/trunk/styles/layout/img/icons/database_lightning.png query:, referer: http://localhost/trunk/styles/layout/tiki.css

Solution

svnup to r52471.

---

icons lost, see update in the description above.

Inline Edited fields do no change to view mode.

In the showcase (on 15.11.2014) when you inline edit a field, that fields remains in the edit mode.
If you change to another item, inline edit there, both items have opened inline edits for the respective fields.
So everytime you click a field in an item, inline edit turns on but never turns off.
