Description

It's not easy to get information in your mail box from all tiki sites where discussions are held in forums, in order to find out which threads didn't receive any reply. Imagine the user forums (many) in t.o.: you need to browse through many forums to see the threads that didn't receive any reply yet, in case you know answers to amny questions, but your time is limited and you want to focus first in the threads that didn't receive any reply yet.

A new option to include 'Threads with no replies yet' to Daily Reports and to Notification digests would be very useful. This idea is borrowed originally from vbulletin, which included this feature many years ago. See example of email received from another software (probably vbulletin, even if I can't tell for sure any more) where that section is included.

In fact, an even better solution could be to create a new module for "Threads with no replies yet", and allow some way to let the tiki admin include some modules in Daily Reports and in Notification Digests.

userfoo, We're proud to announce that LQ ISO has now facilitated over 49 MILLION Linux

downloads! Visit <http://iso.linuxquestions.org/> for all your Linux distribution download needs. With over 2,600 Linux distribution versions available for download, LQ ISO is the place to download Linux. Would you like the latest Linux and Open Source news? If so, follow us on twitter: <https://twitter.com/linuxquestions> Also note that we're now regularly posting original news to the Linux - News forum. Visit <http://www.linuxquestions.org/questions/linux-news-59/> to discuss the latest Linux and Open Source news. Did you recently get a new Android device or Chromebook? Visit <http://www.androidquestions.org/forum.php> for Android related discussion/help and <http://www.chromeosquestions.org/forum.php> for ChromeOS related discussion/help. Along with LQ, these sites form The Questions Network. -jeremy

<http://jeremy.linuxquestions.org/> ***SPONSOR*** Introduction to Linux - A Hands on Guide This guide was created as an overview of the Linux Operating System, geared toward new users as an exploration tour and getting started guide, with exercises at the end of each chapter. This book contains many real life examples derived from the author's experience as a Linux system and network administrator, trainer and consultant. They hope these examples will help you to get a better understanding of the Linux system and that you feel encouraged to try out things on your own. Receive your complimentary guide: http://linuxquestions.tradepub.com/free/w_mach01/
