Description

12.x fullcalendar: Can't click on event anymore to see full record and use clicable links

Example:

<http://intercanvis.net/tiki-calendar.php?todate=1410019200>

Try to click on the event on Sat September 6, for instance. On mouseover, the popup box is shown, but you can't click on the event to see the full record (there is another url that is shown only in the full record of the event in the calendar:

http://intercanvis.net/tiki-calendar_edit_item.php?viewcalitemId=570), and the url in the description textarea is shown in the popup box but it's not clicable either (I wonder if it should be clicable, anyway, from there).
