Description

The option

*Send an email to the user in order to allow him to validate his account.*

in /tiki-adminusers.php *Add New User* tab

is only available if in /tiki-admin.php?page=login

*Users can register* is ticked

Then and only then the hidden option becomes visible:

*Validate new user registrations by email*

By tickinig it the option

*Send an email to the user in order to allow him to validate his account.*

in *Add New User* tab bcomes availabale.

This option should be available independend if or not the option *Users can register* is selected.

The ticking of a hidden configuration shouldn't be relevant for any functionality.
