Description
When clicking on the print-icon when viewing an tracker item, the print will only show the item main field, but no other content.

When clicking the print icon, all tabs have not set a class="active" and are therefore not visible.

Its even not working here on this site. Clicking on print for this tracker item just shows the title...

Solution
Fixed in r53709 31.1.2015.
Added a param print=y/n to the smarty function block.tab.php. Example {tab name="{tr}View{/tr}" print=y}. This will force the activation of the tab when clicking the print icon.

Maybe it is possible to get the active tab from a cookie or via jquery into a smarty variable, but I haven't seen anything like this.

This new print param might be useful somewhere else as well.
