Description

The jQuery dialog boxes used on the Admin Modules page for assigning modules aren't showing up properly.

Solution

~~wont fix: it looks broken when jQuery UI theme is set to "None"~~

~~For this preference there is a default theme called "flick", so if you pick "none" on purpose i guess you want "none"~~

Update by lindon:

Fixed with r54637. The problem had nothing to with the jQuery UI theme - the add module and module option buttons weren't resolving to the correct url

## Comments

**Gary Cunningham-Lee** 18 Feb 15 09:40 GMT-0000

I don't see the problem here now. Earlier, I noticed bad text-background color contrast but don't at the moment. Or if it's still a problem, what site theme and jquery ui theme are being used?

**gezza** 19 Feb 15 20:21 GMT-0000

when it is set to something else, it seems ok

jQuery UI should have some default look, hadn't it had before?

**Lucias d' being**  19 Feb 15 23:53 GMT-0000

Is it with the default theme? In 12.x the fivealive theme (default) included all the necessary CSS matching styles for jquery-ui dialogs so it defaulted to "None" as it was no more needed to have the flickr jquery-ui theme as default. Maybe they were not ported/merged to 13.x and trunk?

Solution: add them back or return the default back to some other jquery-ui theme than "None" (I thought there will be no more jquery-ui actually replaced all by bootstrap but it seems we cannot make it for Tiki 14)

**gezza** 24 Feb 15 07:19 GMT-0000

so now tiki\_base.css should include these default rules

**Gary Cunningham-Lee**

Like to "Smoothness," which is pretty neutral. If this fixes the problem, it seems like a better solution than adding the extra CSS rules.

👤♂ 26 Feb 15 00:11 GMT-0000

That would "fix" it too. 😊

**gezza** 27 Feb 15 08:41 GMT-0000

at lib/prefs/feature.php I see feature\_jquery\_ui\_theme defaults to 'flick', which seems good

should we just remove the 'none' => tra('None') option?

and make a Tiki14 release note about it?
