Description
      The jQuery dialog boxes used on the Admin Modules page for assigning modules aren't showing up
      properly.

Solution
      ~~wont fix: it looks broken when jQuery UI theme is set to "None"~~

      ~~For this preference there is a default theme called "flick") , so if you pick "none" on purpose i guess
      you want "none"~~

      Update by lindon:
      Fixed with r54637. The problem had nothing to with the jQuery UI theme - the add module and
      module option buttons weren't resolving to the correct url

Importance

Comments

Gary Cunningham-Lee 18 Feb 15 09:40 GMT-0000

I don't see the problem here now. Earlier, I noticed bad text-background color contrast but don't at the moment. Or if it's still a problem, what site theme and jquery ui theme are being used?

gezza 19 Feb 15 20:21 GMT-0000

when it is set to something else, it seems ok

jQuery UI shold have some default look, hadn't it had before?

luciash d' being ⬚ 19 Feb 15 23:53 GMT-0000

Is it with the default theme? In 12.x the fivealive theme (default) included all the necessary CSS matching styles for jquery-ui dialogs so it defaulted to "None" as it was nomore needed to have the flickr jquery-ui theme as default. Maybe they were not ported/merged to 13.x and trunk?

Solution: add them back or return the default back to some other jquery-ui theme than "None" (I thought there will be no more jquery-ui actually replaced all by bootstrap but it seems we cannot make it for Tiki 14)

gezza 24 Feb 15 07:19 GMT-0000

so now tiki_base.css should include these default rules

Gary Cunningham-Lee 24 Feb 15 08:05 GMT-0000

Like to "Smoothness," which is pretty neutral. If this fixes the problem, it seems like a better

solution than adding the extra CSS rules.

luciash d' being []>Gary Cunningham-Lee 26 Feb 15 00:11 GMT-0000

Replied to Like to... That would "fix" it too. 😃

gezza>Gary Cunningham-Lee 27 Feb 15 08:41 GMT-0000

Replied to Like to...
at lib/prefs/feature.php I see feature_jquery_ui_theme defaults to 'flick', which seems good

should we just remove the 'none' => tra('None') option?

and make a Tiki14 release note about it?
