Description

Just got an error in debugging console of IE10 when posting comment here:

```
//Synchronize textarea and codemirror before comment is posted $(".comment-form>form").submit(function(event){ var $textarea = event.target.find("textarea.wikiedit"); //retrieve the text area from the form that is submitted if (typeof syntaxHighlighter.sync === 'function') { syntaxHighlighter.sync($textarea); } });

```

It said something like "find method is not available here" (sorry it was in Czech and not copypasted with the code snipped here).
