• 2nd field in Dynamic items list with Jquery Chosen doesn't get full width to display labels properly
• Jquery Chosen: dropdowns too narrow to view labels

Description
The dynamic items list select gadget is too narrow to be useful. It should probably have a "form-control" CSS class, to widen it to the width of its container.

If "chosen" is activated, the selectfield showing the results has only 27px.
If "chosen" is not used, the selectfield sizes to the length of the width of the longest entry.
