Description
As seen here: http://themes.tiki.org/tiki-pagehistory.php?page=Sample+page&source=0
This happens only when jQuery UI is set to "None".

Workaround
jQuery UI must have a theme set (e.g. Flick which is default).

Importance
1 low

I thought it was already "decided" that you can't set the jquery-ui theme to "none". I also didn't really want to use a jquery-ui theme because it often conflicts visually with the site theme. But then problems result. Does this view-source problem need a code fix, or is the fix just to specify a jquery-ui theme? Are we planning to shift jquery-ui functionality to something in Bootstrap?
