### Description

Hi, this feature used to work in 6.x or so. I'm trying to use it for production, and it doesn't work in 14.x (nor in 12.x, etc)

When you print a whole structure, you expect to have page names added in the titles of sections from the html printed document, and there are only numbers shown there, not the title.

Reproduced here in a show instance, thanks to the "Structured Master Documents" profile:
