### Description

From the IRC log: [http://irc.tiki.org/irclogger\\_log/tikiwiki?date=2015-06-06,Sat&sel=10#16](http://irc.tiki.org/irclogger_log/tikiwiki?date=2015-06-06,Sat&sel=10#16)

"pafnuty joined #tikiwiki

Hello

there is a bug, i think, in libwikixml.lib.php  
but i can not register to submit it (did not get activation mail)  
maybe someone in this chat can?  
libwikixml.lib.php line 47 \$this->zip = new ZipArchive;  
should be \$this->zip = new ZipArchive();

thanks

btw branch 14"

### Solution

No particular bug really reported, more a comment on some valid PHP syntax i think, nothing to fix  
as far as i can see, sorry

When you say it's a bug, how do you (he) mean? What are the symptoms - what crashes?

It's perfectly valid not to have brackets on a new class instantiation in PHP - see <http://stackoverflow.com/a/1945991/2459703> for more.

(Also see Torsten for email validation 😊)

Gary Cunningham-Lee 07 Jun 15 06:51 GMT-0000

Sorry, I just forwarded the report but don't know any details.
