Description
    When a user's preferred language is set to Simplified or Traditional Chinese, that user will notice that upon editing a page the Wysiwyg editor won't complete loading. Other preferred languages I tried including English, Japanese and Dutch do not have this problem.

    To see the bug:
    - Go to http://kong-11768-5699.show.tikiwiki.org
    - After show login, login to tiki as usr: admin and pwd: 12345
    - Menu select: Wiki文档 -> Create a Wiki Page
    - Fill in any name for wiki page to be created
    - Click 创建文档 button
    - Confirm language
    - See the editor is loading for ever...

    I have taken a snapshot just now of the show db, just in case.

Solution
    r56147 Hope i got it the right way round! 😃

Seems to be trying to load a js file that doesn't exist - vendor/ckeditor/ckeditor/lang/cn.js

I'm investigating...

kong 08 Sep 15 10:14 GMT-0000

56147 fixes this bug.Thanks Jonny.

Jonny Bradley 08 Sep 15 12:42 GMT-0000

Thanks to you too, good bug report and thanks for closing it. I'll see if it's possible to backport it to 12.x for the next LTS release too.

Jonny Bradley 08 Sep 15 14:58 GMT-0000

Backported to 12.x in r56152, in case you're interested 😃
