### Description

When I have two words side by side like this:

link1 link2

Then I select the first one and add a link to a file using the FILE tool tip in the edition bar and all is well and I get:

{FILES( fileId="1")}link1 {FILES} link2

Then I want to do the same with the second word. This does not work because it does not add it on the second word. Instead it replaces the first:

{FILES( fileId="2")}link2 {FILES} link2
