Description

I noticed after pulling the latest code from SourceForge that certain icons in the WYSIWYG and Wiki editors were not being set properly. A condition inside an if statement in `/lib/toolbars/toolbarslib.php` on the line 1709 was setting several icons to the plugin.php icon.

I began looking for the cause of the issue and discovered a series of several commits that had caused the bug. The icons in question are the features 'Image', 'File', 'Mouseover', 'Insert Module', 'HTML', 'Include', 'Code', and 'Remarks Box'.

The problem code for each of the above features can be found in the `lib/wiki-plugins/` directory and is attributed to a single line of code in each file. The structure of the hash tables located in these files appears to have been changed from using

```
'icon' => 'path/to/icon'
to
'iconname' => 'iconset_definition'
```

Unfortunately, this has caused the regression on my site. To fix this, I can simply comment out the line with 'iconname', and replace it with the previous 'icon' line, however this increases the number of customizations on my site I would need to keep track of, and would prefer not to go down that route.

The revision numbers and files for the features in question are as follows:

'Image' = r56275 — `/wiki-plugins/wikiplugin_img.php`

'File' = r56269 — /wiki-plugins/wikiplugin_file.php
'Mouseover' = r56280 — /wiki-plugins/wikiplugin_mouseover.php
'Insert Module' = r56280 — /wiki-plugins/wikiplugin_module.php
'HTML' = r56273 — /wiki-plugins/wikiplugin_html.php
'Include' = r56276 — /wiki-plugins/wikiplugin_include.php
'Code' = r56254 — /wiki-plugins/wikiplugin_code.php
'Remarks Box' = r56291 — /wiki-plugins/wikiplugin_remarksbox.php

I looked into the new iconset definitions as well, and didn't notice any issues with it, so this is why I'm submitting the bug report. Let me know if there is anything I can help with!

Solution

Hopefully r56351 will do it for the normal wiki toolbars, still trying to work out a fix for WYSIWYG...
Thanks for the excellent bug report!

Thanks taylor dustin, will investigate - looks like it's work in progress, converting to use the new iconsets instead of the old fixes png icons...

taylor dustin 12 Oct 15 17:19 GMT-0000

I appreciate you looking at my bug report! Any word on when the update for the iconsets will be

completed? So that I can integrate them into my site?

Jonny Bradley 13 Oct 15 10:06 GMT-0000

Hi,

It's an ongoing thing but i see toolbars now use iconsets, so we're getting there gradually (any and all help gratefully received - do come and join in if you can! 😊)

lindon 07 Nov 15 18:11 GMT-0000

I'm closing tis but please reopen a new one if you see any further specific issues.
