Description
    I applied current profile related to spreadsheets (as of September 2015) in profiles.t.o:

    ... https://profiles.tiki.org/Spreadsheet_Test_Profiles

    and it does enable the spreadsheet feature and create the intended spreadsheet indeed, but the indicated contents do not seem to get added.

    Syntax in that profile page is:

    ⧉

    _____

        objects: - type: sheet data: - title: Test Title - [Test, =A1] - [=B2, =B1 + A1]

    I tried with 12.x and 14.x with same results.

Maybe something needs to be tweaked in the profile handler code?:

/lib/core/Tiki/Profile/InstallHandler/Sheet.php

In trunk (future tiki15) it also fails to add the data to the sheet. Help is needed.

Solution
Fixed on r58021, can you please test?

Fix confirmed, thks!
Can you backport, please?
