I couldn't reproduce this on my local environment. TRIM successfully deletes the instance without any error message:

> $ make delete Which instances do you want to remove? (This will NOT delete the software itself, just your instance connection to it.) [0] Tiki Trunk http://localhost/tiki-trunk test@test.com [1] Tiki 12 http://localhost/tiki-12.3 test@test.com >>> 1 $

Are you able to reproduce this on different TRIM installs? Would it be possible to give me access to one of them so that I can check?

Marc Laporte 30 Oct 15 03:02 GMT-0000

looks good now! closing...
