Looks ok to me now, sorry i missed it, let's keep an eye out for these things (we could do with some automated monitoring, couldn't we 🧐)

Jonny Bradley 21 Jan 16 10:53 GMT-0000

seems it's a class generated by composer and stored in temp/cache, so flushing the cache and re-running setup.sh (or composer install) should clear it. That's probably what happened here i think...

Thanks Jonny!
Confirmed it currently works. Thanks for the info on the cache thing...
