### Description

File attachments to a forum post results in 0 (zero) byte size.

- Results are the same using either database or file system for storage.
- File attachment description shows correct file size.
- Downloading the attachment results in 0 byte size.
- Files stored in database shows (using phpmyadmin) correct file size.
- Files stored in file system shows 0 byte size.

### Configuration:

- "Can attach to forum posts (tiki\_p\_forum\_attach)" set to allow.

You can log into the show.tikiwiki.org instance using "tester" and "tester". Attachments created as "admin" and "tester" are 0 byte size when downloaded.

---

Updated from Xavi:

Confirmed in trunk, and this used to work as expected at least in 12.x

I fetched a snapshot of the b dump (since there was no admin password indicated in the bug report, and to make it easy to see any apache error message logged in the server), but I don't get any error

shown in the local apache logs (using trunk).

---

Apologies... "admin" and "tikiwiki"

I was able to reproduce it on trunk with database storage. Will investigate further.

For file storage it works

Constantin B 06 Feb 16 14:04 GMT-0000

I fixed it directly in trunk and didn't follow right Release sequence fix, will take care of this for 15.x and 14.x branched. Sorry.

Constantin B 25 Apr 16 13:13 GMT-0000  
Backported to 14.x and 15.x (some time ago)
