Description
Since updating to 14.2, I can no longer select a file gallery to store the files uploaded through a files tracker field in the 'Options for Files' menu. The dropdown menu only shows ~~, but no gallery files to select. Existing Files fields (created in 14.1) still have their gallery link, but a new Files field in the same tracker presents no option to link to that same or any other gallery anymore, only~~ .

Hi Theobio
It seems ok for me on my 14 and 15 sites, this list comes from the search index so maybe that has failed since your upgrade? Try doing an index rebuild and maybe it will go away? (i hope ;)

Constantin B 21 Feb 16 17:00 GMT-0000

Isn't it just input field "Gallery ID"? I can't see dropdown, do I do something wrong?

Jonny Bradley 22 Feb 16 11:05 GMT-0000

I think if unified index (search) is disabled you just get a plain input box, but if search is on you should get a dropdown (select) menu of the gallery names.
