### Description

2 issues:

1. The side-by-side translation feature is ugly.
2. After

#### To reproduce

1. Install fresh Tiki15
2. Install internationalization profile
3. Watch page *Instructions for the Multilingual Wiki*, see i18n icon
4. →click *Translate*

→Choose a language under "Translate this page to a new language", enter a page title, click *Create translation*

See ugly side-by-side (see snapshot in attachment). That's issue 1

After translation is done, click on *Full translation*

→ One ends up viewing the english page instead of the new translation page issue 2.

But the translated page is well created and the first time it is viewed, it has the info box saying it's new.

### Solution

Thanks Gezza.

That solves issue 1.

I'm not so sure issue 2 is an issue 😊

Staying on the original language version can also fit some use cases.
