Description

Doing a search should display the result page with highlighted terms.
It partially not working (depending on the engine used).

As improvement, it would be nice that the results links contain also a parameter in the url (ie: result1?highlight=searchedword).

Highlighter code is still in Tiki but is not working anymore when used on pages. It seems to work partially on searchresults pages (mysql or elasticsearch diff).

(info rescued from the nextdev.t.o updated tracker item ;-))

Solution

Hopefully fixed in r57608.

Once again it was a more invasive fix than i'd hoped so please test carefully for other regressions (i will too) - thanks

Hi, Bernard. It does work for me at:

<https://nextdev.tiki.org/tiki-editpage.php?page=Development>

Can you reproduce in a show instance?

Bernard Sfez / Tiki Specialist 25 Feb 16 04:55 GMT-0000

It is search feature, not text editing feature. 😊

Xavier de Pedro 25 Feb 16 09:35 GMT-0000

Ok, my bad (I misunderstood it 😊).

I copied your edition at the tracker item in nextdev.t.o back to dev.t.o ;-)

Cheers
