The bug seems to be fixed by rjsmelo r58016 - (thx Nelson for emailing me).
Before I close, I want to do a more in-depth test later to night or so, but it really seems to work (did resend out a wikisyntax-wysiwyg html+ txt version newsletter, that previously caused false encoding when received and today it was sent and received smoothly and intact).

Before I describe in detail, I’ll setup a show instance.

I’ve forced the encoding on the email to be utf8 (since currently tiki is fully utf-8), can you please retest (commit r58016)

Comments

Torsten Fabricius 😊 02 Apr 16 11:57 GMT-0000

Thx Nelson for the fix.
A first test showed, it should work now, but I want to do a more decent test lateron, before I finally close.
@Nelson - which rev# made the fix?

regards,
Torsten

Torsten Fabricius 😊 02 Apr 16 12:11 GMT-0000

Ahh sorry, Nelson just informed me.
Fixed by rjsmelo | at 2016-03-20 | r58016
Thx and best regards,
Torsten
