Description

Hello Tiki community, first time posting here.

I`m having an strange bug when trying to install the syn_organicgrp (v0.2) on my project. I installed de tiki_organicgrp without a problem before, but the other one seems not to cooperate...

What happens is the following:

I install it via the command:

```
sudo php-5.6 console.php addon:install syn/organicgrp
```

and for some odd reason, happens this:

Profile 007_groupcoreactivities was already applied. Nothing happened. (Even though I had nothing installed before).

Tried also to install the 007 profile with the profile command, and even though it said that the profile has been installed, it continues not to work when I enter in a Group page, saying: This profile for this addon has not yet been installed: syn/organicgrp - 007_groupcoreactivities

Im not a web expert, so I`ve been trying to solve this for more than a month, but no success. Thats why I decided to ask for help here.

Thank you all very much!

There are also some other errors reported in the install
Here is the full log

Workaround

This will have to wait till tiki 16, as we plan to do implementation of Roles feature in Tiki before pursuing organic groups again.

Unfortunately the Organic Groups feature will have to wait till tiki 16, as we plan to do implementation of Roles feature in Tiki before pursuing organic groups again. Organic groups addon is currently not ready for production use, as it will be undergoing major revamp after Roles feature is developed. The dependency is important to ensure long term viability of this project because without core Roles capabilities in Tiki, organic groups will be a nightmare to manage.

Fernando Torres 04 Jun 16 00:20 GMT-0000

Hi Nelson, no problem! How can I find some info on these Roles? Searched in the documentation and dev, but didn't find it. I'd like to help (not that I can do much)

Thanks!

Nelson Ko 06 Aug 19 16:49 GMT-0000

Hi Fernando, not sure if you are still using Tiki but Roles will finally be in Tiki 21. See [Roles](#)
