Description

Found out that if you use wiki tags, and SEFURL, the tags feature will be invisible unless you visit the exact link to the wiki page. For exemple, if you have a wiki page named "abc def"you go to foo.bar/abc+def it will work, but SEFURL will make links go to foo.bar/abc_def (assuming you choose it to replace to underlines), and for some reason the tags feature won't show, but all other things work fine.

Show instance: <http://fvttorres-11800-5943.show.tikiwiki.org/>

User: admin

Pass: 12345

Solution

Try r58679, hope it works!

Hi fvtorres

Not sure i follow, can you reproduce this on a show instance? The tags (formerly free tags) feature links to `tiki-browse_freetags.php?tag=atag`, not to the wiki page (so i guess i'm missing something)

TIA

Fernando Torres 24 May 16 05:12 GMT-0000

Hello Jonny,

Made the show instance at <http://fvtorres-11800-5943.show.tikiwiki.org/tiki-index.php> (admin 12345)
Getting there you will understand what is happening

Thanks for your help!

Fernando

Brilliant, got it, thanks - fix on it's way (shouldn't be hard i hope, famous last words...)

Fernando Torres 25 May 16 03:09 GMT-0000

Man, you are fast in the gun!

It is working perfectly now!

Thank you!
