Description
    after paypal payment, the user is shown his own payment invoice as "outstanding" instead of "past", until new page refresh

    cache should be cleared or something when paypal comes back to the user. so that the user sees his/her own payment in the tab "Past", and not in "Outstanding"

    For some reason, the show.t.o instance here hist another error:

    ⎘

    Fatal error: DateTime::diff() must be derived from DateTimeImmutable::diff in Unknown on line 0

    but that might be another story, since I'm not seing in another test server elsewhere where I did the same steps to reprocuce the scenario (http://15x.notre.website).

    You can test payments through the shopping cart:
    http://xavi-9794-5955.show.tikiwiki.org/tiki-index.php?page=cart+products

    or through the plugin group membership (setup to smaller fees, since we are testing in production with paypal):
    http://xavi-9794-5955.show.tikiwiki.org/tiki-index.php

u: admin
p: 12345

other users (user1 and user2, and groups group1 and group2 are created with expiry info for the payment to make more sense and expire after a few days, etc)

At least, the show.t.o will allow anyone to get the db dump to have a local instance for debugging more easily than starting from scratch.

Solution
PArtially fixe din 15.x by jonnyb so that they show up as Past after page refresh or going to the url of the invoice, etc.
