Hi,

when TrackerList is in TableSorter mode and set to 'custom column filters' it puts a filter on all columns, even with ones having the parameter 'type: nofilter'. Tested on several different sites, same thing.

here is a screen shot (fields in red are set to 'type: nofilter'):

Mike

p: 12345

at the field "Native Name"

Solution

Fixed in trunk with r59226 and in Tiki15 with r59227.
