Description

Tablesorter doesn't allow to filter on Tracker item status

See it reproduced here:

https://dev.tiki.org/Trackers#Pending_and_Closed

Solution

Should work if `server="y"`, which I've noted on the doc site.

Addendum : reproduced the fix here:

http://xavi-9794-6037.show.tikiwiki.org/tiki-index.php?page=Tracker_as_Calendar_12#contentTracker_as_Calendar_Tabs-2

Update 2: Re-tagged as 'partially solved' and "pending" since I couldn't make it work in an intranet for a client (Keyword Macau). (with updated svn code, cleared tiki and browser caches, etc). Odd.
