Solution
~~Hopefully fixed with~~ r60761~~. Unable to test as I don't know how to create the top menus used on the tiki sites. Will backport if this fixes the tiki sites.~~

Lindon, I'm afraid r60761 doesn't fix, as the page still shows the bug, even though doc.tiki.org now runs Tiki 19. Moreover, this could only solve cases involving FANCYTABLE. While the example Xavi provided involves FANCYTABLE, there are several other tablesorter usages on tiki.org.

This was worked around for dev.tiki.org with the following "Tiki.org specific design override":

```
.tablesorter-sticky-wrapper.tablesorter-sticky-visible { top: 31px !important; }
```

This unfortunately expects a sticky bar which has a fixed height, which is not the case on dev.tiki.org.
