Related-to

- ✖ Tablesorter: dropdowns in tsfilters are shown as text filters (most of them) when server=y

Description

Reproduced here:

[http://xavi-9794-6037.show.tikiwiki.org/tiki-index.php?page=Tracker\\_as\\_Calendar\\_12#contentTracker\\_as\\_Calendar\\_Tabs-2](http://xavi-9794-6037.show.tikiwiki.org/tiki-index.php?page=Tracker_as_Calendar_12#contentTracker_as_Calendar_Tabs-2)

u: admin

p: 12345

See field "Location" shown as text input field, even if defined as dropdown.

When you change the param server=y to server=n, dropdown is shown as expected.

Solution

This is not a bug - a dropdown list will not be automatically generated when using ajax (server=y) because the list will be incomplete unless all rows are fetched. When using ajax, the dropdown options must be specified either in the tracker field definition for a "dropdown" tracker field type, or in the `tsfilters` parameter.

Workaround

Define dropdown options.
