Description

On a fresh install at Admin -> Log in I enable "Users can register", I uncheck "Validate new user registrations by email" and I set an URL for the field:"URL the user is redirected to after account validation"

So validation is not done using the email link but is done right away after validating the register form.

I create a wiki page: mysuccesspage and tried with page name, a relative path tiki-index.pgp?page=mysuccesspage and an absolute path: <http://mysite.com/tiki-index.pgp?page=mysuccesspage>

I'm redirected to the default registration page.

I enabled back "Validate new user registrations by email"to check and it worked.

-

I created an instance to demonstrate:

Setting are good : <http://bsfez-11581-6095.show.tikiwiki.org/tiki-admin.php?page=login>

Success page exist : <http://bsfez-11581-6095.show.tikiwiki.org/tiki-index.php?page=success>
