### Description

Reproduced in trunk and 16.x:

Inability to post a comment-Issue (due to highlighter)

Reproduced in trunk in:

- Login as admin in [http://xavi-9794-3214.show.tikiwiki.org/tiki-view\\_tracker\\_item.php?itemId=5](http://xavi-9794-3214.show.tikiwiki.org/tiki-view_tracker_item.php?itemId=5)

u: admin

p: 12345

And in 16.x in:

[http://xavi-9794-6132.show.tikiwiki.org/tiki-view\\_tracker\\_item.php?itemId=5](http://xavi-9794-6132.show.tikiwiki.org/tiki-view_tracker_item.php?itemId=5)

u: admin

p: 12345

It's currently also affecting <https://dev.tiki.org> bug tracker comments.

When codemirror highlighter is on (desired behavior in some setups, and the one produced by the

new profile "Bug\_Tracker\_15" by default) when you click at submit your comment, you get: "content is empty", so you need to disable the highlighting before you can safely submit your comment.

This feature works as expected in Tiki15.

#### Solution

Fixed with commit r60510 in 16.x and r60511 in 15.x. Latest 15.x had this issue as well - maybe not in older releases. Part of the issue was changed parent container class name and part in the jquery upgrade to 3.1 in 16.x and event handler execution order.
