Description

edit article doesn't save if you change any setting in the advanced tab: to email.

Reproduced in
https://tiki.org/tiki-edit_article.php?articleId=442#content_edit_article1-5

Add any email in the "to" field, and you won't be able to save your edition, or your new article if it was the first time you were writing that.

The action log, in addition, says:

/New article post at tiki.org [Invalid "To" header; contains no addresses]
