Hi Bernard,

Can we see the source code for the example you posted? Also, could we see the tracker fields?

Thanks,

Roberto

Hi Roberto,

( thanks for prepending with my name, I still don't receive notification for comments on devs 😞 )

See :

[http://bsfez-11581-6212.show.tikiwiki.org/tiki-view\\_tracker.php?trackerId=1](http://bsfez-11581-6212.show.tikiwiki.org/tiki-view_tracker.php?trackerId=1)

I have items with no value in the numeric field.

On <http://bsfez-11581-6212.show.tikiwiki.org/tiki-index.php> I setup several options.

- Trackerlist
- List without trackerrender
- List with trackerrender

As you can see only the trackerList plugin is able to display what's in the tracker (null).

The plugin List will always add 0 as default value even if I use trackerrender and the default is "".

Thanks for looking.
