### Description

I've been using for many semesters this workspace template (See below) which allowed me to create a bunch of pages, groups, category, and a few other objects. I've recently updated to 16.2svn , attempted to create the new workspace "2017a Spring" for this new semester based on this same template, and so far I saw that only the default group Courses:\_:2017a Spring was created and not the two subgroups "Courses:\_:2017a Spring Faculty" and "Courses:\_:2017a Spring Students".

So something is borked, and I presume that other parts of the workspace where not created properly (untested yet)

YAML
