Description
If you you the image plugin, and specify "imalign" it produces an attribute "position=center" etc. on the a tag, but that attribute does not exist, and furthermore does not appear to do anything.

The imalign seems to e broken for SVG files, but does work nicely for other images.

At some point someone added that attribute for some kind of reason, am I missing its use or is this nothing more than invalid HTML?
just image

image with align specified

image with imalign specified
