Description

The front end comment options Reply, Edit, Delete, Archive disappear when clicked on and do not bring any menus up or carry out the actions they are meant to. (The rating option however still works ok).

This is happening when I am logged in as an Admin clicking on the comment options for Anonymous users. (I can use the Reply, Edit, Delete, Archive options on my own comments ok).

Solution

r61277 and backport to 16.x r61277 - hope that fixes it 😊

Just checking...

And editing

Just replying, seems fine here and this is running 16.x latest.

Maybe check for js errors in the browser dev console?

It's working ok for me here too on Firefox, however as I specified above it was only when I was logged in as Admin user on my site and try to reply, edit, delete, archive a comment by an Anonymous user.

I'm an admin user here so it must be something specific to your site - can you reproduce it on a show instance here?

If you log in there as admin. On the home page there is a comment by an anonymous user. It's doing exactly the same disappearing act when clicking on the comment options.

tripspec-... Ok, i see it now thanks - must be the page rating thing... will try and fix it 😊

I'm using up to date Firefox. There are a few warnings in the console but no errors.

I will test on another browser and report back.
