### Description

When I edit an older blog post (over 5 years old), the year of the Publish Date gets changed to the oldest year displayed in the year drop down. That happens to be 5 years ago since the Publish date only displays 5 years in the past.

One possible fix would be a checkbox to select whether you want to update the Publish Date at all.

Another fix would be to have the Publish year go back many years in the past. At least 20 as I have blog posts back to 2003!

\\Greg

I also hit this limit when I wanted to enter some old posts from 2013...it's strange that such basic things are still missing in Tiki. 😞
